Summary

Frontend Web Developer with a strong foundation in creating responsive and user-friendly websites. Skilled in modern web technologies like **HTML5**, **CSS3**, **JavaScript**, and **React**. Focused on optimized web applications, improving usability and performance across devices. Passionate about solving design challenges and delivering seamless user experiences.

Skills

Languages: HTML5, CSS3, JavaScript

Frameworks and Libraries: Bootstrap, React

Developers Tools: Git, GitHub, Visual Studio Code

Projects

Maharaja | React CSS   Project Link
- Developed a visually appealing and fully responsive restaurant website, using **React** and styled with **CSS**
- Enhance the website with a mobile-first approach, and applied media queries ensuring an excellent user experience across smartphones, tablets, and desktops
- Implemented a dynamic section featuring the restaurant's daily specials, developed using React components

CodeX | HTML CSS Bootstrap   Project Link
- Designed and Developed a Product Landing Page for Camera Product and Accessories
- Created a modern and **responsive design** with **Bootstrap**, which included components like navigation bars and product cards
- Ensured a seamless navigation flow with distinct pages for different sections

MovieList | React CSS   Project Link
- Created a movie listing application that fetches data from an external API to showcase movie details, such as titles, images, and descriptions.
- Integrated a Favorites page using **React Hooks** to manage and persist state across all pages, allowing users to mark and view their favorite movies
- Implemented features like search functionality, pagination, and responsive design to ensure seamless performance across devices

Portfolio   Project Link
